

CMS App for Visual Components 3D Factory simulator

Mitsubishi Electric Programming Software “RT ToolBox2” Interface for Visual Components

This application is an interface to connect between Visual Components Product Suites 3DCreate / 3DSimulate and Programming software “RT ToolBox2” distributed from Mitsubishi Electric Corporation.

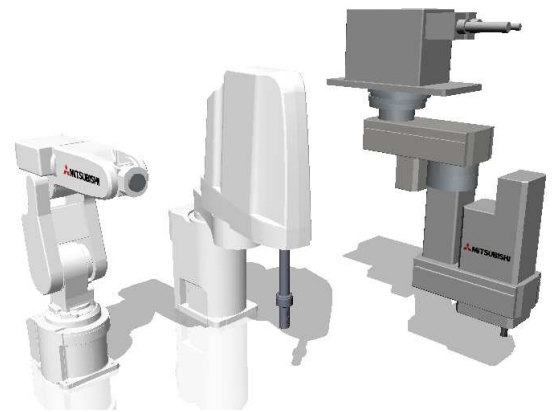

This interface enables you to simulate multiple Mitsubishi MELFA robots in the virtual factory line on the 3D Simulator based on real program programmed with “RT ToolBox2”.

IOs can be connected to Mitsubishi PLC “MELSEC” or Mitsubishi’s engineering tool “GX-Works2/Simulator2” using the optional addon product “PLC Add-on”.

<What is included in package:>

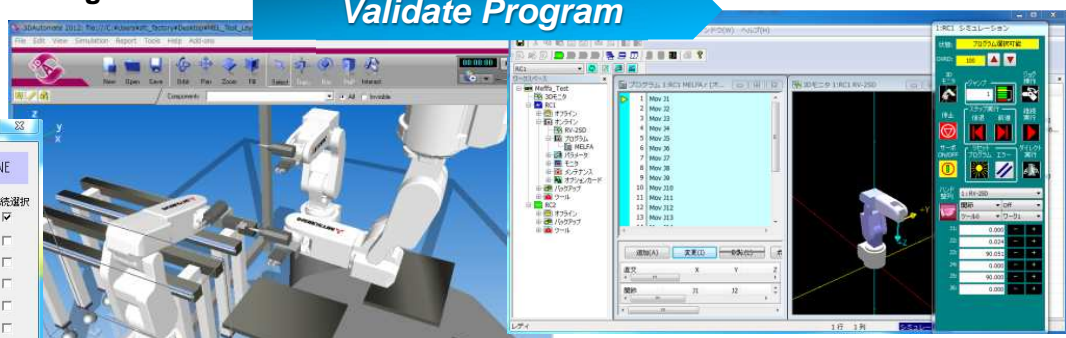

- Interface to connect with Programming software “RT ToolBox2”
- Post Processor for **MELFA Basic** program
- Mitsubishi MELFA robot library

*Programming Software “RT ToolBox2” is NOT included in package.
Need to be purchased separately.

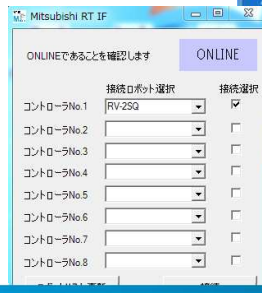

Visual Components 3D Simulator Factory line simulation including multiple robots

Validate Program

**Mitsubishi Electric RT ToolBox2
Create Teach Program and Verify robot motion**

Connect Virtual Robot Controller
