

CMS App for Visual Components 3D Factory simulator

DENSO WAVE
Offline Programming Software “**WINCAPS III**”
Interface for Visual Components

This application is an interface to connect between Visual Components Product Suites **3DCreate / 3DSimulate** and Offline Programming software “**WINCAP III**” distributed from DENSO WAVE INCORPORATED.

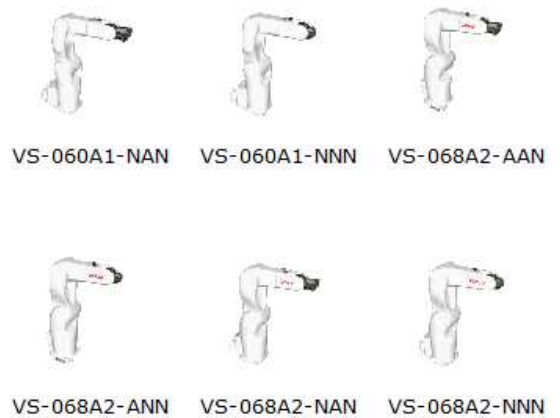

This interface enables you to simulate multiple DENSO robots in the virtual factory line on the 3D Simulator based on real program programmed with “**WINCAP III**”.

IOs can be connected through “**ORiN**” using the optional addon product “**PLC Add-on**”.

<What is included in package:>

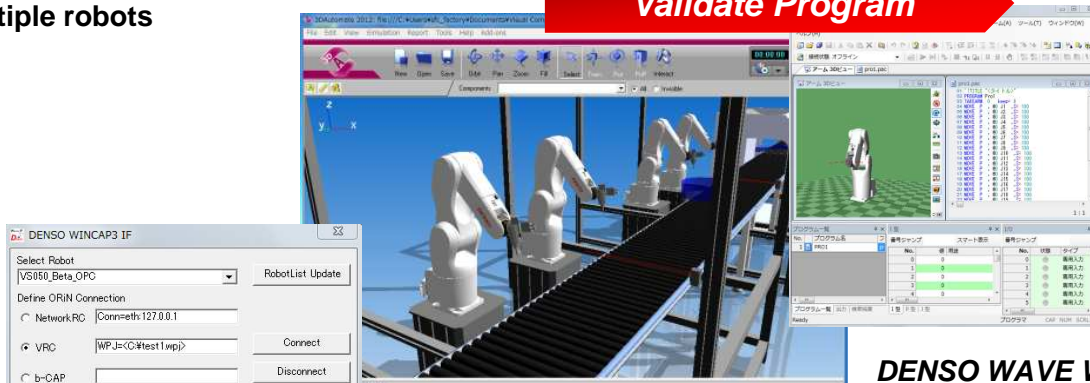

- Interface to connect with Offline Programming software “**WINCAP III**”
- Post Processor for DENSO WAVE **PAC** Program
- DENSO WAVE robot library

*Offline Programming Software “**WINCAP III**” is NOT included in package. Need to be purchased separately.

Visual Components 3D Simulator
Factory line simulation including multiple robots

Validate Program

Connect Virtual Robot Controller

DENSO WAVE WINCAPS III
Create Teach Program and Verify Single robot motion
